Bloom 159 - Australia's first 9.5 star energy rated sustainable home

[All Photos](#) [Share this](#)

The 'Thompson Sustainable Home' has a vast array of benefits. Whether you're looking at the home for retirement living, affordable housing, remote communities, student accommodation, government housing or 1st home buyers, the Thompson Sustainable Home is sure to meet your every desire. Architecturally designed to suit busy lifestyles, the sustainable home fulfills your desire to live comfortably, in style and with modern fixtures and fittings incorporating sustainable materials. In combination, this delivers you a home that is comfortable, healthier and more livable than any other home on the market. The 'Bloom 159' is priced from a low \$169,000*. Building sustainably with a 'Thompson Sustainable Home' is comparable to traditional building costs, however the added bonus is that a 'Thompson Sustainable Home' also provides significant ongoing savings over the life cycle of the home as compared to traditionally built homes. 'Bloom 159' has an energy efficiency rating of 9.5 stars and uses significantly less energy than your traditional standard home. Over the life span of your home the cost of living will be up to 50% less than a standard home. With expected drastic price increases in the cost of electricity set to occur, the only affordable option for the future is going to be to live in an energy efficient home such as the 'Bloom 159.'
