

Capricorn Coast's 'Greenest' Home Now Open

18-Oct-2011

One of the Capricorn Coast's most environmentally responsible homes has opened at Seaspray, drawing strong interest from locals and demonstrating a powerful shift towards eco-sustainable living.

The eco-sustainable home, which has an 8 star energy rating, was officially launched on Sustainable House Day on Sunday, September 11, 2011. More than 30 groups visited the property on its first open day, and interest continues to climb with prospective buyers becoming increasingly aware of the benefits of securing 'green' real estate.

Seaspray marketing manager Zel Creswick said a major drawcard for consumers with 'budgetary constraints' is the affordability of the eco-sustainable home design. The property is exceptionally priced and built to reduce energy and water consumption by up to 50 per cent, resulting in further cost savings.

"We have had fantastic feedback from dozens of visitors to the home over the past couple of weeks, with many people so impressed by the display's unique stylish and modern design," she said. "We are now in the process of installing story boards around the home, which will become the 'narrative' to help people identify with eco-sustainable features and how they function."

The display is situated on Sundance Drive adjacent to Seaspray's Resort precinct. It is open daily from 10.30am – 3.30pm, with personal inspections available by contacting the Seaspray sales suite on (07) 4925 4160.
